

THE LEADER'S EXAMPLE

The team does not copy what you say in the values meeting.

How much your behavior defines the whole team.

AND THE CONSEQUENCE

It copies what you do under pressure.

THE CASCADE

The small gesture with a long reach.

WHAT YOU SEE

You send a message at eleven at night...

THE MECHANISM

...eight people read that as the acceptable hours here...

THE CONSEQUENCE

...and in a month the whole team replies at midnight.

| You made a gesture. The team received a rule.

THE FORK

What gets taught, and when.

WHAT GETS TAUGHT

01

What you say in a meeting? That is a declared intention.

02

What you do under pressure? That is the real rule.

03

What you do when you think nobody sees? That is the culture.

Someone always sees. And whoever sees tells whoever did not.

THE METHOD

The four behaviors the team copies first.

01 REACTING TO MISTAKES

decides whether the team warns early or hides it until it blows

02 TREATING DEADLINES

if you always move it, a deadline here becomes a suggestion

03 TALKING ABOUT OTHERS

your hallway sarcasm about other teams authorizes the war you will have to put out

04 TREATING YOUR LIMITS

hours, vacation and breaks, the team copies what you practice

Each of these comes out multiplied by the number of people watching you.

IN PRACTICE, IN ORDER

The same gesture, seen from two sides.

01 • REACTING
TO MISTAKES

To you, it was just a quick comment.

no intent, no weight, forgotten in ten minutes

02 • TREATING
DEADLINES

To the team, it became information about what is acceptable.

and information about what is acceptable travels very fast

03 • TALKING
ABOUT OTHERS

To you, cancelling the 1:1 was an emergency.

the calendar was impossible that day, and you rescheduled

04 • TREATING
YOUR LIMITS

To the person, it was the third time in a row.

and her conclusion is that this slot does not matter

TWO MODELS

What the team learns from each pattern.

THE COMMON MODEL

The pattern that stalls

A mistake becomes a hunt for a culprit

Deadlines move with no conversation

The other team is always the problem

Working at midnight gets praised

THE DESIGNED MODEL

The pattern that lifts

A mistake becomes a recorded lesson

Deadlines move with notice and a talk

The other team is invited in to solve it

A sustainable pace is the example

MISTAKE AND CONSEQUENCE

Three behaviors with immediate effect.

01 Reacting badly to bad news, one single time.

- one episode is enough for the team to filter everything after.
-

02 Criticizing someone who is not in the room.

- everyone understands they will be criticized once they leave too.
-

03 Demanding punctuality while arriving late.

- visible inconsistency destroys any agreement within a week.
-

| One inconsistent gesture cancels ten consistent speeches.

THE CHAIN

The catchphrase test.

01

Ask the team which line of yours they repeat.

02

One will come up, and you probably did not choose it.

03

That line shows what you taught by accident.

WHERE LEADERSHIP STEPS IN

What people learn from a leader is rarely what the leader planned to teach.

RUN IT THIS WAY NEXT TIME

Three adjustments with multiplied effect.

STEP 01

Schedule your late night messages for the morning.

it costs two clicks and changes the hours perceived as normal

STEP 02

On the next piece of bad news, say thanks before reacting.

the line thank you for telling me early is worth months of speeches

STEP 03

Cut the sarcasm about other teams, including inside yours.

you cannot ask for collaboration after authorizing the joke

A leader's behavior is not a personal example, it is a decision about scale.

THE MODEL THAT STICKS

The Four Behaviors Copied First, in the order that matters.

The team does not follow what you say. It follows what you repeat without noticing.

SAVE THIS FOR LATER

next time you are about to react in front of the team.
