

FEAR OF AI

Fear does not disappear with a speech, it disappears with a map.

How to handle a team that fears being replaced.

AND THE CONSEQUENCE

Saying nobody is replaceable calms nobody, because it cannot be verified.

THE CASCADE

The comforting line that holds nothing up.

WHAT YOU SEE

The team shows concern and you guarantee nobody will be replaced.

THE MECHANISM

The guarantee is not verifiable, and everybody knows it.

THE CONSEQUENCE

The fear drops a level and becomes hallway talk, where you cannot reach it.

A promise you do not control calms for a week and corrodes for the rest of the year.

THE FORK

What is your team's fear actually asking for?

WHAT FEAR ASKS FOR

01

Is it asking for a guarantee?

you do not have one to give, and faking it is worse

02

Is it asking for praise?

that lasts as long as the meeting

03

Is it asking for a map?

that one you can deliver today

Fear is a symptom of missing clarity, not of missing motivation.

THE METHOD

The Map of What Stays, four bands.

01 WHAT THE MACHINE DOES

the repetitive work with clear rules, and it really will shrink

02 WHAT YOU DO WITH IT

the part where judgment enters and speed multiplies it

03 WHAT ONLY YOU DO

context, relationships, choices under ambiguity, accountability

04 WHAT IS LEFT TO LEARN

the capability that moves someone from the first band to the third

The honest conversation admits the first band shrinks. That is why the fourth exists.

WHAT TO ASK, IN ORDER

Four questions to ask alongside the team.

01 • WHAT THE
MACHINE DOES

Which part of your work has clear rules and repeats?

that is the band that shrinks, and denying it does not help

02 • WHAT YOU
DO WITH IT

Where does your judgment change the result?

that is where the tool multiplies you

03 • WHAT ONLY
YOU DO

What could nobody from outside do here?

context and relationships do not download with a licence

04 • WHAT IS
LEFT TO LEARN

What do you have to learn this half?

with a name, a date and a real problem to practice on

TWO MODELS

Two conversations about the same tool.

THE COMMON MODEL

The comfort talk

- Guarantees what it does not control
- Treats fear as low morale
- Talks about the future with no dates
- The fear returns the following week

THE DESIGNED MODEL

The map talk

- Admits which band shrinks
- Treats fear as a request for clarity
- Names the capability with a date
- The fear becomes a study plan

MISTAKE AND CONSEQUENCE

Three leadership stances that make it worse.

01 Denying that anything will change.

- the team compares your speech with what it sees and picks what it sees.

02 Pushing the tool with no room to learn.

- whoever has no time to learn only sees the threat.

03 Hiding your own unease.

- the team's fear is usually yours, reflected on a delay.

A leader who admits their own discomfort authorizes the team to work through theirs.

THE CHAIN

The mirror test.

01

Ask yourself which part of your work the tool already does.

02

Notice the discomfort that answer produces in you.

03

That is exactly the discomfort your team is feeling.

WHERE LEADERSHIP STEPS IN

Whoever never asked themselves that question cannot steer someone else through it.

RUN IT THIS WAY NEXT TIME

Three moves this week.

▣ STEP 01 Draw the map with the team, not for them. four bands on a board, one hour of meeting	▣ STEP 02 Admit out loud which band shrinks. honesty buys more calm than a guarantee	■ STEP 03 Reserve calendar time for learning. learning with no protected hour does not happen
---	---	--

If no calendar time is left, the real message is that learning is not a priority.

THE MODEL THAT STICKS

The Map of What Stays, in the order that matters.

Fear does not disappear with a speech. It
disappears with a map.

SAVE THIS FOR LATER

next time the subject comes up in the hallway.
